

ROSS HAVRYSHKIV

Implementation Consultant | Technical Systems Integration | SaaS, POS, APIs

Ontario, Canada | +1 647-638-3540 | busyrossdeal@gmail.com | linkedin.com/in/ross-havry | github.com/Rostyslav | busyrossdeal.hata.market

Implementation-focused technical generalist with hands-on experience across business applications, POS and e-commerce workflows, API integrations, SQL/data validation, troubleshooting, release checks, documentation, and user support. Bridges workflow needs and technical delivery through practical implementation, validation, and handoff work.

CORE STRENGTHS

Implementation delivery | Workflow configuration | API integrations | SQL and data validation | POS and e-commerce systems | Root-cause troubleshooting | UAT-style validation | Release readiness | Documentation and training | Stakeholder handoffs

PROFESSIONAL EXPERIENCE

LucrumTech Jan 2026 - May 2026

AI Product Engineering Consultant | Part-time

- Delivered and validated four AI sales-platform campaign workflow areas across FastAPI backend and React/Next.js surfaces: tone settings, pre-launch email previews, email quality gates, and subject-line follow-up fixes.
- Checked implementation paths spanning API contracts, service logic, schemas, UI controls, generated-content review states, and human-review fallbacks.
- Reviewed rollout readiness beyond green tests by identifying runtime wiring, analytics correctness, existing-database safety, and post-send editing risks.

Hata Homemade Food Inc. May 2024 - Jan 2026

AI Ops & Platform Integration Lead | Full-time

- Supported business operations through platform integration work across a custom C#/.NET and SQL POS system, WordPress/WooCommerce workflows, and REST API-connected tools.
- Diagnosed workflow and integration issues through logs, database records, API responses, and operational behavior across orders, inventory, pricing, returns, barcode flows, scanners, printers, and payment terminals.
- Built automation and integration tooling across POS, inventory, and e-commerce workflows, reducing manual touchpoints by about 90% while supporting validation, documentation, troubleshooting, and staff training.

Solution.Help Sept 2024 - Feb 2025

Full Stack AI Integration Engineer | Part-time

- Contributed to a full-stack social-impact platform connecting people, organizations, volunteers, and supporters around help and community-action workflows.
- Supported React/TypeScript user-facing surfaces, Python and REST API-connected integration paths, AI-assisted product features, and accessibility-minded delivery.

Haver & Boecker Niagara Sept 2023 - Jul 2024

Software Engineer

- Contributed to internal software and reporting workflow improvements through requirements support, testing, debugging, technical documentation, and SQL/database-focused delivery.
- Helped replace fragmented reporting work with a web application path for tracking, file uploads, and formatted PDF outputs.

EDUCATION

Niagara College | Advanced Diploma in Computer Science | 2021 - 2024

SELECTED SYSTEMS

Retail systems: POS, WooCommerce, inventory, pricing, returns, barcode, printer, scanner, payment-terminal, and staff-facing workflows. **AI workflow delivery:** preview, scoring, regeneration, review-state, and rollout-risk paths for generated campaign content. **Reporting workflows:** internal data capture, file handling, and PDF/report-generation surfaces.

SELECTED DELIVERY PROJECTS

Haver Niagara NCR Platform: collaborative reporting workflow work for logging non-conformance records, handling supporting media, and producing formatted PDF reports from structured data.

AutoName AI Image Classification: local automation workflow for high-volume file classification and naming with structured validation, logging, and downstream data handling.

TECHNICAL TOOLS

Python, FastAPI, C#/.NET, SQL, PostgreSQL, TypeScript, React, Next.js, WordPress/WooCommerce, REST APIs, JSON validation, pytest, GitHub, PowerShell
